## Education

---

### State University

*Bachelor of Engineering in Computer Engineering*

**Sep. 2022 – May 2027**

*GPA: 3.89/4.0, Full Scholarship*

## Experience

---

### Upwork

**March 2023 – Present**

*Python Developer (Freelancing)*

*Remote*

- Completed over 7 projects focusing on automation, including developing scripts and parsers to streamline workflows and data processing.
- Designed cloud-based solutions for efficient deployment and tailored client workflows.
- Utilized tools such as Selenium, BeautifulSoup, and APIs for advanced automation and web scraping tasks.
- Delivered high-quality code and ensured strong communication for timely project delivery.

## Projects

---

### E-commerce Website | *Python, Django, PostgreSQL*

**May 2023**

- Developed a scalable e-commerce platform with advanced features such as cart management, order processing, and secure authentication.
- Optimized performance using caching mechanisms to handle high database query loads.
- Implemented OOP and modular architecture for maintainable and scalable code.

### Real Estate Automation Bot for Craigslist | *Python, Selenium, Anti-detect Browser*

**August 2023**

- Automated posting of real estate ads on Craigslist using undetectable.io and dynamic proxy integration.
- Handled account creation, verification, and scheduling through automated scripts.
- Configured the bot to monitor ad statuses and adhere to Craigslist policies.

## Technical Skills

---

**Languages:** Python, Java, C/C++, Kotlin, HTML/CSS, JavaScript, SQL

**Developer Tools:** VS Code, AWS Cloud Platform, IntelliJ IDEA

**Technologies/Frameworks:** Django, Flask, Linux, Git, PyTest, PostgreSQL, Docker, RabbitMQ, Redis, Selenium, Playwright, Requests

## Achievements

---

- Solved 450+ algorithmic challenges across platforms like LeetCode, improving problem-solving skills.
- Completed 70+ SQL tasks, mastering database querying and optimization.
